Fawn Arrival™ Powder & Paste

Every fawn is valuable! It is critical to provide support for a healthy digestive system to help produce healthy, fast growing fawns that become adults that meet your performance goals!

Fawn Arrival™ contains ingredients designed to support a fawn's natural immunity and help maintain a healthy digestive system in young deer.

Fawn Arrival Products Contain The Following Key Ingredients

- ⊕ Organic acids and absorptive compounds to help maintain a normal, healthy digestive system
- ⊕ Contains both egg yolk and whole egg proteins
- ⊕ Micro-encapsulated direct-fed microbial cultures to supply beneficial micro-organisms that occur naturally in the GI tract of healthy animals
- ⊕ Essential oils
- ⊕ Additional ingredients, including yucca, psyllium and vitamins, that work with the other key ingredients to support a healthy digestive system and help maintain a healthy, functioning immune system.

Fawn Arrival is available in two easy-to-use forms designed to fit your operation.

Fawn Arrival powder is perfect for bottle fed fawns. 150 gm pouch for 5 fawns for 14 days.

Fawn Arrival paste, in a convenient 15 gm paste tube, for giving to fawns left on their mother.

For optimum results, give according to label directions at birth and during the first few weeks of life to support a healthy GI tract and help grow healthy fawns and large adults.

Incorporate Fawn Arrival into your newborn fawn program today to help maintain a healthy digestive tract and support immune health.
