

# **Fawn & Deer XTR™**

## **Robust, Fast GI Support for Cervid Health**

**Contains a source of live (viable) naturally occurring microorganisms**

There are times when fawns and older deer need robust, fast support to help maintain normal digestive health, a healthy, functioning immune system and promote intestinal well-being in cervids.

Fawn & Deer XTR is a specifically formulated combination of new and proven technologies designed to quickly support normal GI tract health and help maintain a functioning immune system in cervids of all ages.

In addition, Fawn & Deer XTR can be used post-tranquilization when it's important to help maintain proper gut flora and support a fast recovery.

### **Fawn & Deer XTR Contains The Following Key Ingredients**

- ⊕ **Innovative source of soluble and insoluble fibers containing organic acids**
  - Provides support for a normal, healthy digestive system
  - Helps maintain the normal protective mucous lining of GI tract
- ⊕ **Micro-encapsulated Probiotics**
  - Nourishes natural gut flora in the digestive tract and supports the immune system
  - Micro-encapsulation helps to protect probiotics from stomach acid and bile while ensuring stability in storage
- ⊕ **Whole egg and egg yolk proteins**
- ⊕ **Select Milk Proteins**
- ⊕ **Supplemental Vitamins**
  - Vitamin D3 supports a functioning immune system
  - Vitamin B helps during times of environment stress

Fawn & Deer Revival comes in a convenient 15 gm adjustable tube offering flexibility for giving proper amount to fawns, young and adult deer.
